

1. Insert DVD into optical drive.
2. Start VLC Media Player.
3. Select "Media" on the menu, then select "Open Disc"

4. Your disc should show in the “Disc Device” section. You need only click “Play”

5. Controls are located across bottom of VLC Media Player window. Place your pointer over a button, and you'll get a pop up that describes the button's function. The "Toggle Fullscreen" button is a nice one.
